

SAP partners: Want to help your customers quickly adapt to new technology and business change?

Succeed with one simple solution.

SAP® Workforce Performance Builder

State-of-the-art learning software for easy-to-create training, and documentation
and in-application guidance for virtually any software or process

Customer success – whatever your business model

“SAP Workforce Performance Builder provides a nice revenue stream. The solution improves end-user adoption and retention, and it has significant sales potential.”

- Amy Baker, Product Marketing Manager, Epicor Software Corporation

Complete, intuitive authoring of all documentation

Learn on the job with in-application training

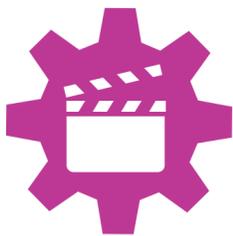

Customers create and embed step-by-step training within the specific applications their users must know.

Reduced help-desk tickets*

Record any business process or transaction

The intuitive process recorder lets customers capture any SAP or third-party process and create training on any topic.

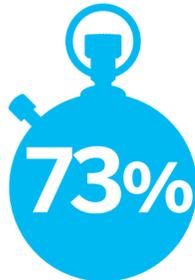

Faster documentation of processes*

Stay productive during business and technology change

Simplified training and documentation workflow speeds customer adoption and ROI for new upgrades and solutions.

Faster process execution*

Constantly improve with cost-effective, targeted training

Customers worldwide stay competitive with automatic training updates that are preconfigured for specific regions and languages.

Reduced training and support costs*

Get your customer's workforce productive on the very first day of a business change.

SAP Workforce Performance Builder helps you help your customers get more value out of their technology investments – and simplify software training across the enterprise.
