

Enjoy Smooth Sailing on Your Voyage to the Cloud with SAP® Services

When it comes to new business software, nothing beats the speed of cloud deployments. But without the right mix of expertise, governance, and capabilities to guide the way, many companies encounter rough waters that can knock them off course. For smoother sailing on your voyage to the cloud, let the SAP® Services organization light your way with expert strategy development, road mapping, implementation support, governance, and quality assurance services that are proven to deliver the outcomes you expect.

Steering your way to better, faster implementation projects

Strategy, direction, and readiness preparation

How do you prepare for your voyage to the cloud? We can help you navigate the waters ahead with our cloud advisory and strategy (CAS) service for SAP solutions. The CAS service includes a strategic review of your cloud readiness and an individualized cloud road map with supporting business scenarios. This road map enables you to align resources, prepare the organization for adoption, and achieve success during your transformation into a cloud service-based enterprise.

Cloud solution fit analysis

Once your course is set for any given project during your voyage to the cloud, how can you help ensure the best possible outcomes? This is where project design matters most. SAP Services provides lean methods, safeguarding with an eye on critical issues such as integration and data migration, and advice on the best mix of cloud and on-premise solutions that fits your needs.

A STRATEGY THAT WORKS

Cloud adoption requires strategic thinking and the ability to execute with efficiency. From charting your course to going live from project to project, our proven cloud advisory strategy services help both you and your organization plan, chart, and move forward with confidence – allowing you to reap the rewards of cloud computing.

Cloud governance

As you navigate your way to the cloud, how do you know when you're prepared to launch a specific project? Experts from SAP can get you moving forward with confidence by helping you set up individual projects, validate their proposed scope, and implement a proper governance structure.

Cloud architecture design

Before you embark on the high seas, do you know if your voyage to the cloud will proceed as intended? To help ensure the success of each step, SAP Services can review your architectural options based on your strategic direction. We offer advice on the right platform and solution mix and the best way to transition them to operational and support teams with changed capabilities.

Set your sails for greater cloud project success.
